BIGGEST FLOWER SEED NEWS IN MANY YEARS

Exciting new "Parkspak" envelope preserves seed life.

PARKSPAK is the name we've given to our revolutionary new hermetically-sealed seed package.

PARKSPAK is guaranteed to keep seeds "Harvest Fresh." When you break the seal of a PARKSPAK at planting time you will find your seed perfectly preserved at the very peak of its youth and vitality.

Scientists have found that moisture in the seed and humidity around it, more than anything else, tend to destroy the health and vigor of the seed under normal room conditions. Paper cannot keep moisture out to prevent deterioration of the seeds, so we have discontinued the use of paper packets.

Guided by the results of scientific research, we have for many years preserved the harvest-freshness of our seeds by drying them in dehumidifier vaults; from which they were taken for shipment to you.

Now, thanks to hermetically-sealed, moisture-proof PARKSPAK, the seeds are not only packaged at the peak of perfection—they actually come to you with all that perfection completely preserved.

This new process guarantees that Parkseed, the world's finest flower seed, will be harvest fresh, full of vigor and vitality when you break the seal at planting time. All of Park's flower seed henceforth will be packed in PARKSPAK®—at regular prices, with no extra cost to you.

New Flowers from Around the World

Illustrated on facing page 2

(1) HELIOPSIS, Sun Glory

A showy, long lived perennial you can treat like an annual. It blooms quickly the first season. The 3 ft. plants are lovely in the border and furnish multitudes of lasting, long stemmed flowers for your arrangements from July through Sept.

971A—SUMMER SUN 3 ft. Pure yellow flowers are 4" across and a large percentage of the plants bear fully double flowers. New this year. Pkt. (100 s) 35c; Dbl. Pkt. 65c.

(2) CHRYSANTHEMUMS

Grow them from seeds. They will bloom the first season, and last for many years. The seeds are easily started, results very satisfactory.

EARLY GARDEN MIXED. Full double and semi-double 3-4" flowers from late August to frost. Shades of red, pink, white, yellow and intermediate shades included. Easily grown. **0532—35 seeds 35c; 70 s 65c; 125 s \$1.**

(3) ASTER Color Carpet

So uniform you won't believe it's real, but for borders, low beds, walkways, or pot plants, nothing excels these extremely uniform, globular shaped, extra dwarf plants, producing Chrysanthemum-like, full double, 4" flowers which cover the plants completely. Only 8" high, it is 14" across and is more dwarf and 2 weeks later than Dwarf Queen, blooming in early August.

0220—COLOR CARPET. Pkt. (200 s) 35c; Dbl. Pkt. 65c.

(4) MIRABILIS Pygmy

The popular, very useful dwarf form was lost during World War II. It has just been recreated by a devoted Italian breeder. Only 20" tall, the vigorous plants form erect mounds, covered in gay, brilliant bloom. Excellent for beds, borders, or pots. The colors include pink, salmon, red, yellow, and polychromatic striped ones for contrast. Easily grown. New this year.

1367—PYGMY. Pkt. 35c; Dbl. Pkt. 65c.

(5) MATRICARIA White Stars

For an immaculate, everblooming edging, low border, or bed, these 6" mounds of floral perfection are just right. The Anemone-type flowers, with broad guard petals, cover the plants all summer. Bred and selected in Sweden with meticulous care by devoted floriculturist, Mr. Gortz. It is one of the nicest new things this year.

1332A—WHITE STARS. Pkt. (Fine seeds) 35c; Dbl. Pkt. 65c.

(6) PETUNIA with MARIGOLD

A happy choice in color blending and in plant material, they joyfully bloom together all summer long.

PETUNIA PLUM DANDY. Large, substantial, rain-resistant flowers of a bright, very compelling shade of fuchsia-purple cover 15" husky mound-shaped plants. An extra vigorous satisfactory performer.

1641—PLUM DANDY. Pkt. (150 s) 50c; 400 seeds \$1.00.

MARIGOLD PETITE YELLOW. Compact, perfectly uniform, neat mounds 6" tall, 10" wide, hide themselves in sheets of bloom. Very early, long blooming, easily grown, and bright.

1277—PETITE YELLOW. Pkt. (50 s) 25c; Dbl. Pkt. 45c; 1/8 oz. \$1.00.

(7) PANSY Color Carnival

A superb American grown F₂ Hybrid, Swiss Giant strain, comparable to Roggli's Original, and improving it in vigor. A magnificent, deep-toned color range, heavy textured, long-lasting giant flowers and husky, vigorous, free blooming plants make it a delight to the gardener from the starting of the seed through the pride and satisfaction of its beauty in the garden.

1485—COLOR CARNIVAL. Pkt. (100 s) 35c; Dbl. Pkt. 65c; 375 s. \$1.00; 1/8 oz. \$2.25; 1/4 oz. \$7.75.

(8) SWEET WILLIAM

Wee Willie

Blooms quickly, ultra dwarf, colorful all summer, easy to grow. Like frosting on a cake, ribbon on a package, Wee Willie gives a finishing touch to the border never before possible. A distinct, new strain which begins to bloom when 2 inches high, is in full bloom 7 to 8 weeks after sowing at a height of 4 inches with 4 inch spread.

0752—WEE WILLIE. Pkt. (300 s.) 35c; Dbl. Pkt. 65c; 1/8 oz. \$1.00.

Pictured Behind Wee Willie is **BLUE MIRROR DELPHINIUM.** Twelve-inch mounds of large, navy blue spurlous flowers opening upward for a much more attractive effect than any other annual Delphinium.

0696—BLUE MIRROR. Pkt. (100 s) 25c; Dbl. Pkt. 45c.

(9) GERBERA Fantasia

The cherished, full double, exotic form has heretofore been available only in plant form. Last year, to our delight, we were able to offer seed sent us by an Indian floriculturist which produced 50% double flowering plants. This year's crop of seed is significantly better. It now produces 75% fully double flowering plants. The size of the blooms, earliness, and sturdiness of the plants is greatly improved. The color range is magnificent: clear-sparkling rose, pink, crimson, scarlet, yellow, white and cream.

1962 Fashion Flowers

featured on our front cover

(1) PETUNIA, Pink Riches

Full double flowers 3" across of the most luscious shade of warm rich pink completely cover the compact 14", husky, mound-shaped, spreading plants. This is a color universally loved, and the ruffled flower petals show a delicate lace work of deeper pink, adding character and interest. The plants and flowers are quite rain and weather resistant. Superbly suited for borders, beds.

1569—PARK'S PINK RICHES. 100 seeds 50c; 200 s. \$1; 500 s. \$2; 1/128 oz. \$4.50.

(2) CANNA, Seven Dwarfs

Snow White loves each one, and you will too. This new series, a Park exclusive, gives new uses, new handling ease, new low cost to the Canna family. Now it is a home garden flower in every sense. Only 18" high, they bloom from seeds in the flat in 12 weeks. The beautiful deep green, waxy, tropical-appearing foliage is lovely by itself, but with the bright bloom constantly there all summer, it is truly "gold from the mines of the Seven Dwarfs." Let your imagination run rampant. Grow it in the border, use it as a low bed, pot it for the porch. Because it was so elusive in our breeding program, we chose to call the first separate color by a name which in no way denotes its beauty, but we hope it will bring a smile as you enjoy its lovely color.

551A—GRUMPY. The color is that elusive, universally loved hue between red and rose. It is brilliant with a shining quality which seems lighted from within. Don't miss the most interesting new flower for 1962.

552A—SEVEN DWARFS MIXED. The mixture consists predominantly of red, rose, orange, yellow, salmon. Either above: 7 seeds 50c; 15 s. \$1; 30 s. \$1.85; 45 s. \$2.75; 1/2 oz. \$3.50.

(3) BASIL with ZINNIA

Basil Dark Opal, as a bed or border by itself, is an unusual, enchanting garden decoration, but in combination with other things such as Zinnia Old Mexico, it adds depth and tone to the entire garden scene. The plants are very uniform, with a height of 15", a spread of 12", forming dense little bushes. The foliage is an attractive shade of dark purple. All America '62.

0292—DARK OPAL. Pkt. (200 s.) 35c; Dbl. Pkt. 65c.

ZINNIA OLD MEXICO. Variations in deep red and sharp yellow are strikingly displayed here. Fully double 2 1/2" flowers are produced in profusion, clothing husky 16" plant mounds in glorious color all summer long. Highest All America Award for 1962. Easily Grown.

2166—OLD MEXICO. Pkt. (100 s.) 50c; Dbl. Pkt. 95c; 3 Pkts. \$1.35.

(4) COVER SCENE

Variety is the spice of life and as this picture shows, flower colors naturally look good together. Here are our most fashionable varieties. **SUN SOUFFLE.** Park's new Giant Flowered F₁ Hybrid Marigold is magnificent and the largest we have ever seen, with flowers up to 5 1/2" in diameter. Sun Souffle is a lush golden color. The gaily frilled and

ruffled petals combine into a fluffy ball, giving beauty that lasts for weeks, even in rainy and humid weather. All flowers are fully double! The plants are very uniform, base branching, 3 ft. high and grow well all season, producing blooms in abundance.

1304—SUN SOUFFLE. 25 seeds 50c; 75 seeds \$1; 150 s. \$1.50; 1/8 oz. \$3.50.

RED MAN ZINNIA. For a splash or a mass of the most brilliant Chinese red color all summer long, this extra giant cactus flowered Zinnia is just the thing. Erect, bushy, semi-dwarf plants bear huge 5" flowers made up of delicately quilled, refined petals. Long sturdy stems make it ideal for cutting.

2165—RED MAN. Pkt. (50 s.) 50c; Dbl. Pkt. 95c. All America Winner 1962.

PETUNIA SUGAR PLUM. Nothing can compare, for no other is like it. Lush, regal, rich wine-red with prominent, deeper, lacy veining. Rainproof flowers 2 1/2" across cover mound-like plants the entire season. Best performing F₁ Petunia.

1624—SUGAR PLUM. 40 seeds 25c; 150 s. 50c; 400 s. \$1; 1000 s. \$2; 1/128 oz. \$4.50.

PETUNIA PARK'S WHITE RICHES. Our all double multiflora Petunias have proved most satisfactory and easily grown by the home gardener. This one produces "visions of loveliness" in full double, pure white 3" flowers, so profuse they cover shapely, snowy, 14" mound-like plants. A Park Exclusive.

1568—WHITE RICHES. 100 seeds 50c; 200 s. \$1; 500 s. \$2; 1/128 oz. \$5.50.

(5) BEGONIA Angel

Enchanting, delicate color harmony to delight the eye, it is fresh and new, never before found in seed grown fibrous Begonias. Husky, dwarf plants, prolific in bloom, bear tightly packed double flowers like 1" balls of fluff in ivory with soft coral trim to give a lovely effect. Christmas Angel is delightful as a house plant for Christmas and winter bloom or for the shady summer border. 50% double.

313A—CHRISTMAS ANGEL. Pkt. (200 very fine seeds) 50c; Dbl. Pkt. 95c.

PELLETED SEED

Makes sowing easier

Increasing the size of very fine seed makes it easy to handle and to space properly. You can see where they are. The coating protects the seed and furnishes plant food and disease protection.

The technique of applying an inert coating to seed has advanced greatly in recent years. Pelleted seed is now reliable and quick in germination. It requires different handling than ordinary seed, so be sure to follow the directions we furnish with seed.

1574 Hanging Basket All Double

1617 Petunia All Double Sonata, our finest white

GIANT DOUBLE PETUNIAS

Intensive work continues on the All Double Petunias, and each year they improve in size, plant habit and color range. The seeds are necessarily very expensive due to the fact that they have to be carefully hand pollinated and there is real art and scientific knowledge required to produce seed which will give consistently Double flowers. The seed are smaller and the seedlings weaker than the Single kinds, require care in starting. Park's All Double Multiflora Class is superior for beds or borders. See pg. 21.

Sow the seeds on Milled Sphagnum Moss in accordance with directions we provide with the moss. Moisture control is simplified, "Damping Off" eliminated, Park's "Sure Fire" Starter Kit (See Pg. 78) makes growing Double Petunias easy and sure. The seeds are very small, and the 25c pkts. contain only a few seeds. The larger Pkt. is the better buy. After the All Double Petunias get past the baby plant stage, they are quite vigorous and can "take it." Outstanding for beds, borders, accent points.

1133 Perennial Sweetpea

The Best SWEET PEAS

The Sweet Pea has all the good qualities of a perfect annual for general cultivation. It is easy of culture, growing in almost any soil and sunny situation, begins to bloom when small and, if freely cut, will continue for a long period. Flowers are rich and colorful, deliciously fragrant, and are freely borne on long stems. Excellent for cutting.

Are Sweet Peas Hard to Grow in Your Climate?—Here's The Answer.

HEAT RESISTANT SWEET PEAS

Cuthbertson's Floribunda

Not only do they continue blooming long after hot weather has come and other sweet peas have died, but they begin blooming two weeks ahead of the Standard Spencers. The flowers are of the true Spencer Orchid Flowering type with long stems and wavy petals. Large and deliciously fragrant, they are produced in great quantity on plants of exceptional vigor. The colors are bright and clear. If you grow only one strain of Sweet Peas this is the most practical.

2003—LOIS. Rose pink on white ground.

2004—JIMMY. Best scarlet variety.

2005—DAISY. Pure white.

2007—DANNY. Dark blue.

2006—CATHERINE. Salmon rose on cream ground. Above colors: Pkt. 25c; oz. \$1.00.

1965—CUTHBERTSON'S FLORIBUNDA MIXED. Extremely vigorous, long stemmed, heat resistant; all the attributes of regular Cuthbertson's, but provides more bloom under comparable conditions, and greater perfection of flower form. Well grown, each long stem will bear 5-6 blooms. It replaces the older strain in our list. Pkt. 25c; 1/2 oz. 60c; oz. \$1.00; 1/4 lb. \$3.00.

Early Multiflora Gigantea

Six, often ten, fragrant, giant wavy blooms are evenly spaced on extra long, strong stems. Vines are healthy, vigorous, early, heat resistant, long blooming. New this year.

1971—MIXED. Pkt. (50 s.) 35c; 200 s. \$1.00. 1 oz. \$1.65.

1962—GIANT LATE HEAT RESISTANT MIXED. In originator's tests these, Giant Spencers, Earlies and Cuthbertson's were given identical care. These produced long stemmed flowers abundantly thru July into August, long after the others failed. Won't you try them? Pkt. 25c; 1/2 oz. 75c; oz. \$1.35.

ZVOLANEK'S SUPERIOR PEAS

We feel that the fine varieties offered below are the best Sweet Peas grown today. They are the result of years of painstaking selection on the part of William Zvolanek, veteran California Sweet Pea breeder. These three types of multi-flowering Sweet Peas have terrific vigor which manifests itself in an abundance of extra long (18-20") pencil stems, each carrying 5-6 even up to 8 flowers instead of the usual 3 or 4; and in marked heat resistance.

Early Multiflora.

Earliest to bloom, yet vigorous and heat resistant. Under proper culture yields the finest Sweet Peas it is possible to grow.

1973—EARLY MULTIFLORA MIXED. A complete, balanced blend of about 30 varieties in all Sweet Pea colors.

Flori-bunda (Spring)

Especially for outdoor planting, these bloom two weeks before the late type and are very strong in growth and heat resistance.

1990—FLORI-BUNDA MIXED. Pink, lavender, purple, white, cream, rose, salmon, cerise, carmine, red, blue are all represented in this choice blend of colors.

Plenti-flora (Summer)

1967—PLENTI-FLORA MIXTURE. A complete full color range.

1968—SULPHUR YELLOW. Zvolanek's Plenti-flora. Deepest cream or light sulphur yellow.

Ginger Snaps

(Panorama)

These are the Famous F₂ Hybrid Outdoor Snapdragons Developed through years of Intensive Breeding Work by the Eminent Hybridist,* Mr. Charles Weddle.

There is no finer Snapdragon than the Ginger Snap, with the single exception of the magnificent new F₁ Hybrid Rocket shown and described on pages 38 and 39. (The Rocket is also, of course, a Charles Weddle development.)

Ginger Snap was developed specifically for the home gardener. Although the seed is inexpensive (considerably less than the still-rare Rocket seed), it comes in the widest range of beautiful colors, as listed below.

The plants build a heavy foundation before starting to bloom, thus they are a week or two later than Carrousel, below. The revelation comes when bloom begins. The plants branch from the base, providing a multitude of heavy cane-like 2½ ft. stems to hold the heavy spikes of extra large florets. They need no staking. The colors are very bright and clear with a glowing sheen to glisten in the sun. The plants are of uniform height, so look well in the border. Ginger Snaps take adverse weather in stride and the heavy textured flowers keep well. Cut all you want, for if kept picked, the plants bloom and improve until the hard freezes of late fall.

Ginger Snaps in your garden will be the envy of the neighborhood. Try some this year. They're in highest fashion.

* Mr. Weddle is eminent for his work on F₁ Hybrid Petunias, some of his most recent creations being Comanche, Paleface, Firedance, Prima Donna to mention but a few. He was the first American to discover the secret of producing All Double Petunias. See pg. 21.

When plants are a few inches high, keep well cultivated and give thorough soaking every two weeks.

"You Get the Best from Park"

January 1, 1962

Dear Friend:

This is a year of exciting events, and we extend a wholehearted invitation for you to enjoy them with us.

First there is a host of new flowers, some of them right out of "Fairyl-land." Perhaps the most interesting and different of all is Canna-Seven Dwarfs, but Christmas Angel Begonia is lovely beyond description too. Pink Riches Petunia, Sun Souffle Marigold and Light Touch Double Gloz-inia are among the finest new flowers we've seen. There are many others all through the book; varieties from England, France, Holland, Switzerland, Denmark and Germany. Things like the beautiful ornamental Dwarf Scarlet Bean, Fire Emerald Gazania, Double Primula Obconica, and many others. Many of these we found on a European search for new and better flowers to make your gardening more fun.

To have so many new flowers to offer you in one year is unusual, but to have in the same year a new scientific development of long range importance is a "once in a lifetime" thrill. That is how we feel about the exciting new PARKSPAK, a packaging development of ours that fulfills a long standing dream.

PARKSPAK is the name we've given to the new foil package in which all Park seeds now go to our customers. In this hermetically sealed packet Park seeds reach you under virtually the same scientifically controlled atmospheric condition that we maintain in our storage vaults. The risk of spoilage from excess humidity during shipping or prior to planting-time is virtually eliminated. This kind of protection for seeds has been used by the industry for some time at the wholesale level. PARKSPAK is, we believe, the first practical application of the same principles to consumer packaging.

We dry the seed to perfect, scientific, low moisture content just after harvest. Then at the peak of its youth and vitality we hermetically seal it in our PARKSPAK 'O Gold. This keeps all that super vigor in the seed until you break the seal at planting time. We think you're a real treat in store for you when you plant Parkseed, kept fresh in PARKSPAK.

As always, we look forward to serving you, and with the reminder that "Half the Fun is in the Growing," we wish you success and happiness in your gardening adventures.

Floricordially,
GEO. W. PARK SEED CO.

President

..and here are some Reasons Why:

A TRADITION of DEPENDABILITY for 93 years

GEORGE W. PARK began selling flower seeds in 1868, and through his catalogs and "Park's Floral Magazine," he served gardening enthusiasts all over America. He is now almost a legend in gardening circles.

Not long before his death in 1935, "Fortune Magazine" published an article about his business career. He was described as the "Bete Noire of the Seed Trade," because he insisted on selling his fine seeds at considerably less than other seed firms.

He truly believed and lived his creed "Your success and pleasure are more to Park than your money." This was his interpretation of the verse from Proverbs: "A good name is rather to be chosen than great riches, and loving favor rather than silver or gold."

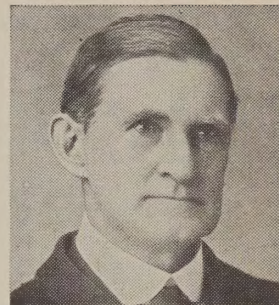

While this policy did not make him rich in worldly goods, he was rich in friends, for he felt each customer was his friend.

George W. Park left a great heritage to his sons George and William. Along with it went a great responsibility to serve the flower lovers of America with the finest flower seeds at reasonable prices, and in such variety that everyone would find his every wish in "Park's Flower Book."

His favorite prayer by John Henry Jowett expressed Geo. W. Park's faith in God, in his fellow men, and in the spiritual value of gardening.

GOD'S LOVE, AND BEAUTY

"My Father in Heaven, help me never to forget Thy Love to me. It comes with the light of the morning, and it remains with the light of the stars of the night. It looks up to me in the beauty of the flower. It shines upon me in the smile of a friend. All beautiful things are the gifts of Thy love. Help me to be thankful, and to link every beautiful thing with Thee. —Amen." JOHN HENRY JOWETT

GEO. W. PARK
1852-1935

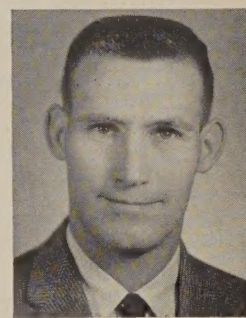

CONTINUING THE TRADITION

GEO. B. PARK

Geo. B. Park endeavors to make sure that the seeds packed under the Park label are the "Cream of the Crop;" that every worthwhile new variety, every good older one is presented to you accurately in "Park's Flower Book."

William J. Park endeavors to make sure that Park's service is superior in every way; that Park's catalog for commercial growers serves them well; that the breeding and trialing programs are well done; and that careful research enables us to maintain and improve the quality of the seeds we offer.

WILLIAM J. PARK

PARK'S TRIAL GARDENS

We feel that one of our most important services is represented by these trials, which are conducted solely to compare available "strains."

Each year about 2000 samples are grown. From planting to maturity, they are carefully evaluated. Trials in the North, Mid-West and West are also evaluated. Based on the results of

these trials, we make certain that the seeds supplied you under the Park label are grown by the specialist who is doing the best job on that particular variety. In this way we know that "You Get the Best from Park."

PARK'S GREENHOUSES

Our greenhouses are modern in every respect. Automatic heating, ventilation, cooling and watering assures plants of the very best quality for you. Packing and shipping room is an integral part for quick efficient handling.

Three most important functions of our greenhouses are: The germination tests* conducted to assure the vitality of our seeds; the trials of window garden and greenhouse seed strains; the breeding program which is carried on in them.

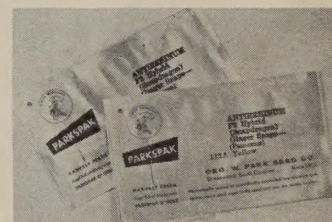

*Germination tests are also made in seed department germinators.

THE PARK ORGANIZATION

Our organization, built over the years since 1868, is highly efficient and stands ready to serve your every gardening wish.

We'd like to take you through our plant—to show you how carefully the seeds are stored; how conscientious are our co-workers; and the modern methods by which your orders are handled.

Perhaps the most important reason we can give such prompt and accurate service is that the Park staff is made up of folks who are interested, not in just a job, but in giving a service. They take pride in getting your order out the day it comes in. They're proud to send the good seed we have for you, and they feel a warm bond of friendship for Park customers. This is part of the tradition.

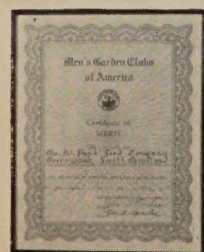

Hermetically Sealed "Parks Pak" Seed Packets

The biggest news in the seed business in 1962 is "Parks Pak", the ingenious foil packet that keeps all the fresh vigor and vitality in the seed until you break the seal at planting time.

Latest Developments, Highest Quality

Double Gloxinia Seed and Plant Production under the watchful, careful eye of Klaus Neubner, Park plant breeder and production supervisor. New varieties and maintenance of quality require constant, skillful control.

PARK BRINGS YOU THE WORLD'S FINEST FLOWER SEEDS

We are highly honored and humbled. The Men's Garden Clubs of America presented us with the certificate of Merit for: "The introduction of outstanding plants over a period of years."

Many of the seeds we sell come from careful European Floriculturists whose work is a lifetime labor of love. Last year George Park visited many of these. Many new items in this catalog resulted from his trip.

The Cessna 195 "Parkspeed III" helps in our quest for new varieties. It takes us all over America to evaluate trial gardens, visit our growers, check on the crops, and to observe new things in breeders' work shops. We see how our new flowers will perform in all sections of the country before we introduce them.

INDEX, GERMINATION and CULTURE GUIDE

When sowing seeds it is always best to divide the packets and sow at different times. Note the time and give good care until the plants have had time to appear. The following table gives the time normally required for germination of each variety of seeds. This time may vary as much as 25% either way. Do not condemn seeds until you have given them at least two or three trials. Those marked z or having the dagger (†) beside them may lie dormant for a year or more. The other tables are self explanatory, and while they are somewhat complicated, do give a great deal of information about each of the hundreds of species listed.

PERENNIAL FLOWER SEEDS

Pages 48 to 62 bring you the broadest assortment of fine perennial flower seeds that we have ever offered. With permanence and charm, perennials are truly "things of beauty and a joy forever."

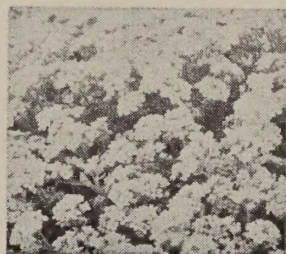

These are valuable subjects of the flower garden, as most of them are not only showy and beautiful when in bloom, but will do service year after year for a long period, enduring cold, excessive rain and drought. They are easily grown from seeds sown in spring or summer.

hp. HARDY PERENNIALS are hardy plants which will live and bloom every year for a long period. They are very valuable for borders and cut flowers, and once established require less care than the annuals. Hardy perennials listed pgs. 48 to 62 begin blooming the second year from seed.

hb-HARDY BIENNIALS are those which bloom the second year from seed, then die. For a continuous display of this type, seed must be sown every year.

Primrose Cultural Notes

Sow in pots or pans as early in the year as possible, water, cover with glass and place outdoors where the soil will be frozen. When milder weather sets in bring into gentle warmth and seeds will germinate freely. Freeze seeds in ice cubes for similar effect. Allow plenty of time—seeds are often tardy. Primulas need partial shade, rich, porous soil, and a mulch of pine needles or salt hay to keep roots cool—this seems the answer to growing them in warm climates. They like the east side of a hill, shelter from wind, good drainage.

0321 Karin (Frosty)

DOUBLE FLOWERED BEGONIAS

In 1957, we introduced the first seed grown Double Fibrous Begonia, Christmas Candle. Since then, we have been able to produce several new varieties. Every lover of house plants, every home greenhouse owner, will delight in these. The outdoor gardener will find there is nothing nicer for a shady border or bed. Park supplies you seed for all the plants you want at less than the cost of one ready grown plant. Double Fibrous Begonia Seeds are produced and offered exclusively by Park.

0311-BLUSHING BABY. The color of the double flowers is as soft and sweet as a baby's dimpled cheek. Of pure light pink, it is perfection itself against the waxy sheen of the medium green leaves. The seeds produce 75% full double flowering plants. Pkt. (200 seeds) 50c; Dbl. Pkt. 95c.

313A-CHRISTMAS ANGEL. New. See pg. 1. Pkt. 50c.

JEWELITE. Some of the most pleasing color combinations in all the Floral Kingdom are found in the various Jewel-toned glowing hues produced from this F₁ Hybrid seed. Each glowing color is displayed to perfection against the waxy deep bronze-red of the "Jewel-Case" foliage. Colors range from deep scarlet red through rose-red, to light rose-pink, with some of the most beautiful rose shades ever seen in Begonias ranged between. Flower form varies from full-double like a rose, to Anemone type with a large crest where the petal color is interspersed with yellow, others are loosely double for a Carnation effect, while about 25% will be single. Every plant, including the singles, will have the harmonious dark foliage and lovely colors.

0312-JEWELITE. Pkt. (200 s.) 50c; Dbl. Pkt. 95c; 2 for \$1.75.

PARK'S CHRISTMAS CANDLE. Fluffy balls of rich, deep rose-red against the shiny emerald green of the waxy leaved, dwarf rounded plant give Christmas Candle universal appeal. In bloom constantly the year round, it is an exceptionally fine pot plant for your winter window, or in shady summer beds. Uniform, floriferous.

3307-CHRISTMAS CANDLE. Pkt (200 s.) 50c; Dbl. 95c.

WHITE CHRISTMAS. The effect is one of pure shining snow against the waxy, bright green leaf background. Tightly packed petals form fully double, long lasting, Camellia-like flowers of pure white with suggestion of lemon-ivory in the centers. Big flower clusters are borne on compact, bushy 12" plants in great profusion. Seeds produce 75% double flowering plants.

READ'S GERANIUMS

Mr. F. G. Read, plant breeder extraordinary, of Norfolk, England, has devoted 20 years (a lifetime labor of love), to the Pelargonium (Geranium). Results of his work are shown in two of his strains offered at right, one below.

Dwarf Geranium

LITTLE READ'S. Very dwarf, bushy plants of uniform habit, cover themselves in bloom; often open 10 big trusses on one little plant. 50% of the plants produced from this seed will be 6 inches or less in height, and very highly disease resistant; the remainder will be of normal height. Color range includes scarlet, orange, salmon, rose, pink, white and lavender.

1540—MIXED. 5 seeds \$1.; 12 s. \$2.; 20 s. \$3.

0875 Park's Double Gloxinia, Royal Red (Seed)

Double Gloxinia Seed

For several years, we have had a very concentrated breeding program on Double Gloxinias, in an effort, not only to produce additional colors, but also to overcome the problems involved in the production of Double Gloxinia Seed. Our offer below of several fine varieties is the result. Plants grown from these seeds are 100% true to color. 50 to 75% of the plants produce exquisite double flowers with an interesting variation in form. 25% produce attractive single flowers. We offer 4 colors.

0875—ROYAL RED. Bright, luminous velvety red. The largest flowers are found here.

871A—ROYAL BLUE. A beautiful deep Gloxinia blue color. Royal blue.

0872—ROYAL FROSTED RED. Scarlet and white, the most brilliant contrast in Gloxinias.

872A—ROYAL FROSTED BLUE. A lovely combination of blue and white.

Any of the Double Gloxinia Seeds above Pkt. 150 seeds \$1.00; 450 seeds \$2.50.

C012—DOUBLE GLOXINIA COLLECTION: 4 Pkts. One of each above (600 seed) \$3.50.

870A—DOUBLE MIXED. Pkt. (300 seeds) \$2.00.

Now, by starting with the seeds, you can have all the Giant Double Gloxinias you want for less than the cost of one ready grown plant.

Seeds of Double Gloxinias are produced and sold exclusively by the Geo. W. Park Seed Co.

Controlled Light Makes Seedlings Grow Strong

Seedlings need much higher light intensity than full grown plants. A window often does not give enough light to grow strong seedlings, especially in the sometimes prolonged cloudy and rainy periods of early spring. When too little light is given, tall and spindly plants will result. Scientific studies and our own experiments proved that you can achieve the same ideal light conditions of a greenhouse in your own home by applying artificial light. Simple to use, illustrated instructions included.

The Items on This Page Are Components of Starter Kits

AVAILABLE SEPARATELY FOR YOUR CONVENIENCE

Many years ago, we began a continuing test program. Its goal: to find sure and easy to use methods and materials for germinating seeds and growing plants at home.

Little headway was made until about five years ago, when we came up with milled Sphagnum moss, Jiffy Pots, Electric heating cables, Jiffy Flats. Combining these with proven methods gave us the desired "Sure Fire"® way of growing seeds. *"Park's Gardener's Handbook", completely re-edited and enlarged, gives complete directions with superb photographs of every step.

We are certain that the materials and method we now offer are the best to be had in the entire floral industry. This is evidenced by our own laboratory tests and by the letters from our customers telling of their success in growing even the most difficult kinds of seeds.

* Handbook sent on request with any order. See page 78 for "Sure Fire"® Seed Starter Kits.

Giant Dahlias

Are easily grown from Park's strong tubers

THE VARIETIES LISTED here are selected with painstaking care from the thousands of varieties in cultivation. Those listed on these pages are the best growers, freest bloomers, and those listed as mammoth will give the largest flowers Dahlias can produce. Growing show dahlias does take careful disbudding, and proper care.

KEEPING CUT DAHLIAS. Strip the foliage except at the top, recut the stem and immerse in water as hot as the hand will bear. When water cools transfer the Dahlias to cold water and place in the cellar overnight. Treated thus they will keep for several days and increase in size.

DAHLIA CULTURE. This subject including how to prevent disease and get rid of insect pests is covered fully in "The Gardener's Handbook." For bedding effects plant on or a week before frostproof date. For exhibition blooms plant late (May and June). Late planting brings the plants into bloom during late summer and fall when the cool temperatures promote better blooms.

EXHIBITION DAHLIAS. Exhibition Dahlias and satisfactory tubers can not be produced in the same hill. If you want 12 inch flowers, go after them with fertilizer, water and disbudding.

(8) PARK'S GIANT DOUBLE GLOXINIAS

A well grown double Gloxinia is one of the most spectacular house plants, normally having about 20 blooms open, completely crowning the plant, and 20 or 25 additional buds ready to carry on the procession of blooms for several months. The extra petalage adds a lot of extra color area by comparison with single varieties, making for a far more colorful display.

A number of Double Gloxinia plants, seeds, and bulbs are now available, most of them exclusively from Park having been developed by us. These are listed below; however, they are more fully described on pages 69 and 88.

Double Gloxinia Seeds

Grow all the plants you want from seeds for less than the cost of a single ready grown plant. Seeds produce 50 to 75 per cent double flowering plants, 25 per cent single.

By nature, these bulbs are very small but very productive. Use 3 bulbs for each 8-inch pot.
